Summary

Creative recent college grad looking for that first opportunity in a field that I am passionate about! Excellent communication skills, a strong work ethic, and a passion for challenge! Experience with quickly picking up new technologies and implementing them in a comprehensive and efficient manner.

Languages and Tools

Libraries and Concepts

Projects

- EvitOrg** – Event organization app built with Ruby on Rails. Allows for the host of an event to create and assign tasks to attendees and upload images to the event page. Utilizes Facebook login or generic login with password encryption. Extensive jQuery animations to smooth the transitions between pages. This project was a team collaboration.
- Voice Chat** – Chatting app using MEAN stack and Angular. Uses WebRTC technology to negotiate a peer to peer connection. Also uses Socket.io for text chat and user status transmission in real time. Back end is Express and Mongoose with MongoDB.
- Formula1 Databucket** - Uses the [Ergast](#) Formula 1 API to pull driver, track, and team information in JSON format, parse through, and display data. Utilizes Google Maps API and a custom-made graph-construction library alongside Materialize. Based upon a PHP/CodeIgniter/MySQL back-end.
- Winslow** – A front-end only website created for a local salon. The existing website lacked responsive design. Using Adobe Photoshop, text and margins were removed from the images. Styling was updated, and an overall better user experience was achieved.

Education

Coding Dojo – Bellevue, WA

- **Immersive full-time web-development boot-camp:** Graduated with double Black Belt (completed 4 full-stack, timed exams) and built dozens of web apps.

Central Washington University – Ellensburg, WA

- **BA, Music with focus in classical piano** - August 2013

Work Experience

2012 ● Sales and Leasing Consultant - Barrier Audi

- 💡 Constantly provided industry-leading customer service.
- 💡 Achieved highest customer satisfaction rating in a dealership ranked in the top ten in North America.
- 💡 Worked as part of a dynamic sales team to meet dealership goals and maintain a high standard of customer care.
- 💡 Dramatically increased quality of customer delivery by recognizing and overcoming shortcomings in vehicle-prep process.

2014 ● Leasing Specialist - Essex Property Trust, Inc.

- 💡 Streamlined mass email generation ~80% by developing a complex Excel sheet that interfaced with resident management system.
- 💡 Worked as part of the management team to constantly mitigate risk via development and implementation of new community policies.

2015 ● Web Developer - Winslow Salon (Freelance work)

- 💡 Worked with owner of Winslow Salon to develop new mobile-first website.
- 💡 Heavy use of photoshop to remove text from, resize, and compress images. Deployed through GoDaddy.
